Computer Engineer with strong skills and interest in Android development, backend integration and problem solving. Passionate about building applications and tackling real world problems through technology.

TECHNICAL SKILLS

Core Android Development	Kotlin, Java, Android SDK, Jetpack Compose, XML (Views), MVVM, Clean Architecture, Retrofit (REST API integration)
Data & Storage	SQLite, Room, MySQL, PostgreSQL, Firebase
API & Networking	REST APIs (Retrofit), MQTT, gRPC, Postman (API testing & debugging)
Tools & Dev Environment	Android Studio, CLI Git, GitHub, Gradle

EDUCATION

Bachelors in Computer Engineering
Nepal Engineering College, Bhaktapur
2022-2026, CGPA: **3.83/4.00**

10+2 NEB, 2019-2021
NAMI College

Secondary Education Examination, 2018
East Pole Secondary School

Basic Level Examination, 2016
Bal Jagriti English Boarding School

PROFESSIONAL EXPERIENCE

Citytech Group Pvt Ltd

Jan 2026 - Apr 2026

Software Engineering Intern

- Developed and maintained an Android applications in a fintech environment, integrating REST, MQTT, and gRPC APIs for real-time transaction processing.
- Worked on POS systems including finPOS terminals, kiosks, and payment integrations.
- Contributed to the full development lifecycle, from feature implementation to debugging and deployment on physical POS hardware.

Freelancing Developer

Jan 2022 - Present

FullStack / Android / Graphics Developer / Data Collection & Processing

- Worked for various independent clients, managing everything from initial requirement gathering to final deployment.

PROJECTS

UrbanFinder

<https://github.com/xArE0/UrbanFinder>

- Kotlin, Jetpack Compose, OSM Map, React, PostgreSQL, REST API
- Mobile and Web application providing centralized platform for tenants and property owners

PashuSewa

https://github.com/xArE0/TeamRocket_CodeSprint

- Kotlin, Jetpack Compose, Firebase, TensorFlow/TfLite
- Cattle monitoring system predicting diseases and assisting farmers, runner-up hackathon project.

ACHIEVEMENTS

Karmalaya-X Project Competition Winner

Hosted by CAARD supported by Franklin Education Consultancy

- UrbanFinder (Kotlin, Jetpack Compose, OSM Map, React, PostgreSQL, REST API)

CodeSprint Hackathon, Runner Up

necIngenium Program sponsored by ViaNet, LogPoint

- PashuSewa (Kotlin, Jetpack Compose, Firebase, TensorFlow/TfLite)

TechSprint Hackathon, Runner Up

Hosted by CAARD supported by Franklin Education Consultancy

- SubsidyGuard (Kotlin, TensorFlow, Python, Firebase)

CERTIFICATIONS

Data Visualization (Kaggle), Python (Kaggle), Computer Vision - Build convolutional neural networks with TensorFlow and Keras, Machine Learning Foundations - AWS Educate course
